

Online Editor ready for Photobooks

SHORT DESCRIPTION

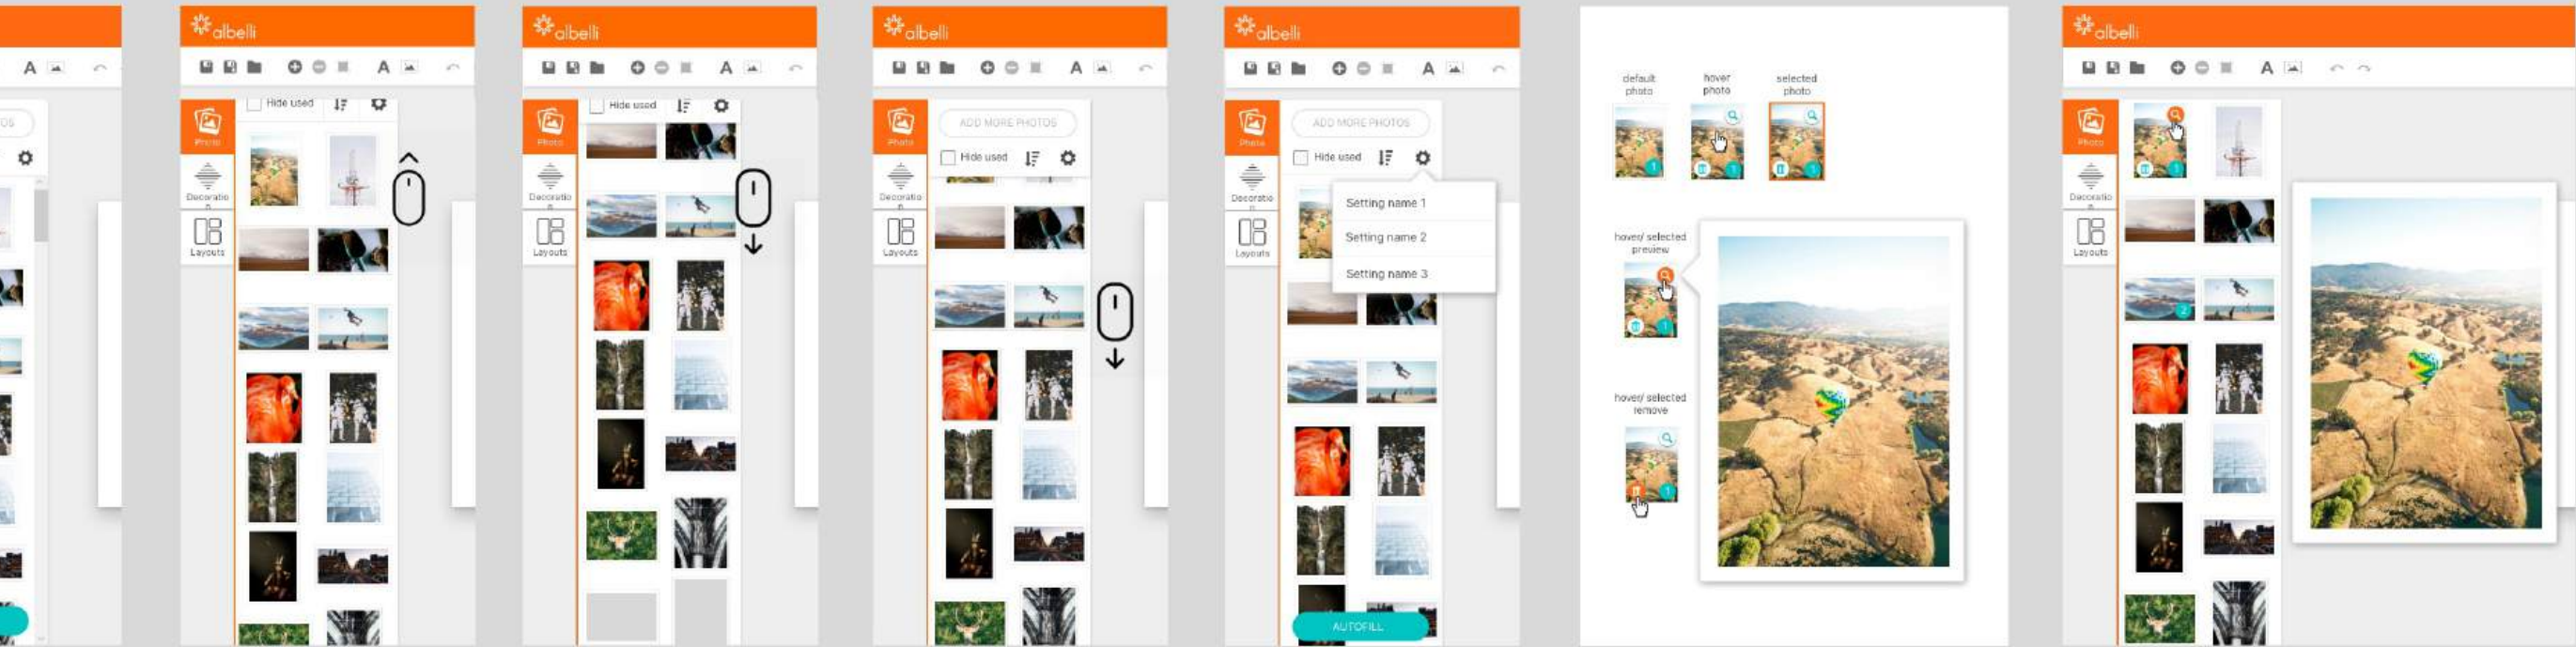

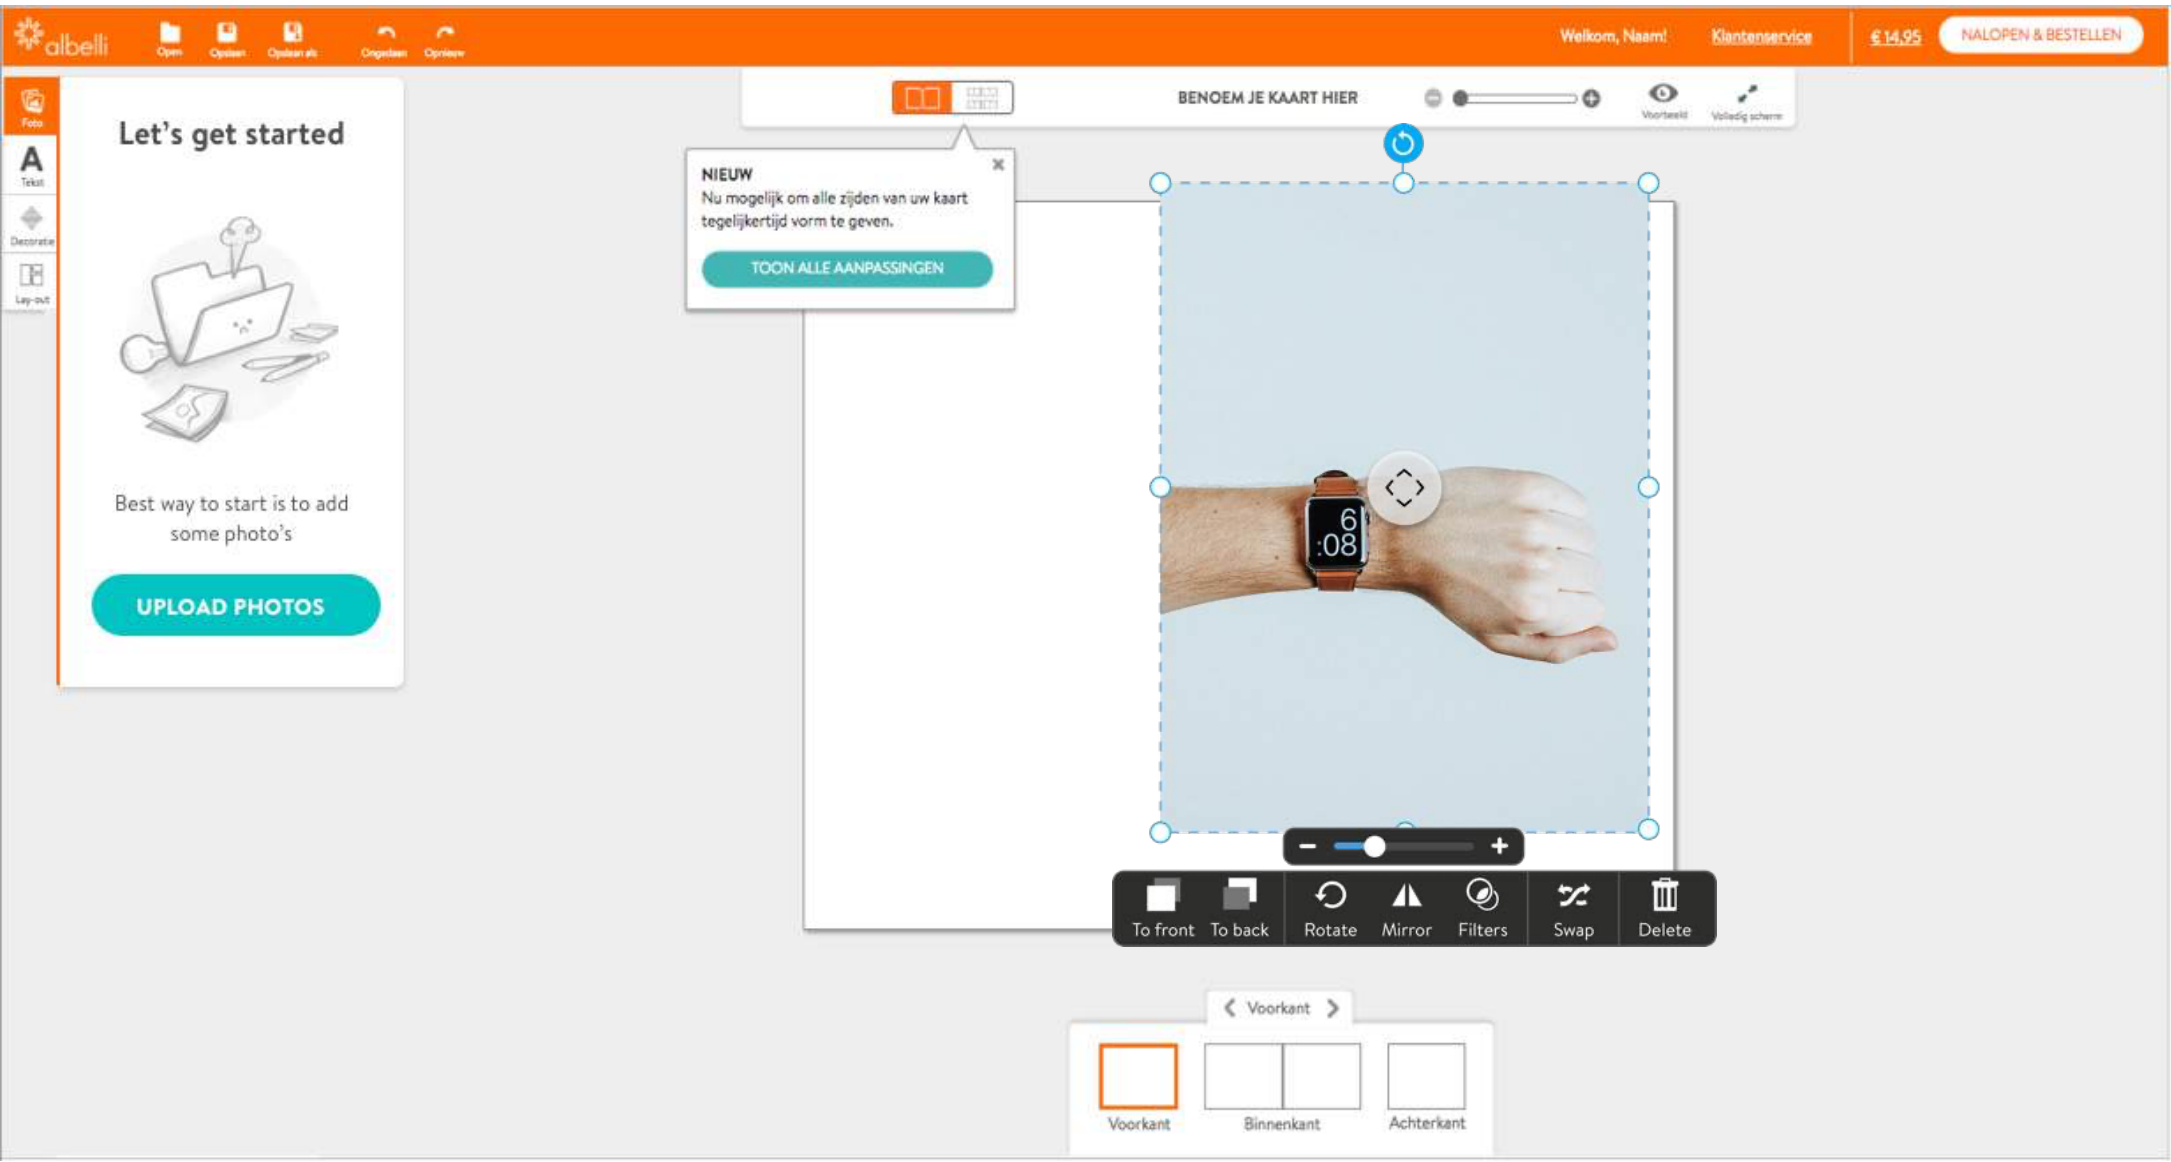

The Online (HTML5) editor was created first for other albelli products (calendars, mugs, etc). But those products needed less editing options and therefor their current editor setup wasn't scalable 1-on-1 to photobooks. For me the challenge to re-design and validate that customers of all products would be happy with the new setup.

ROLE

Senior UX Designer
UX Researcher

EXAMPLE SCREENS

Basic overview of all functionality in the renewed editor followed by a detailed design of how one of the the left menu tabs interacts.

Integration of Smart Assistant

SHORT DESCRIPTION

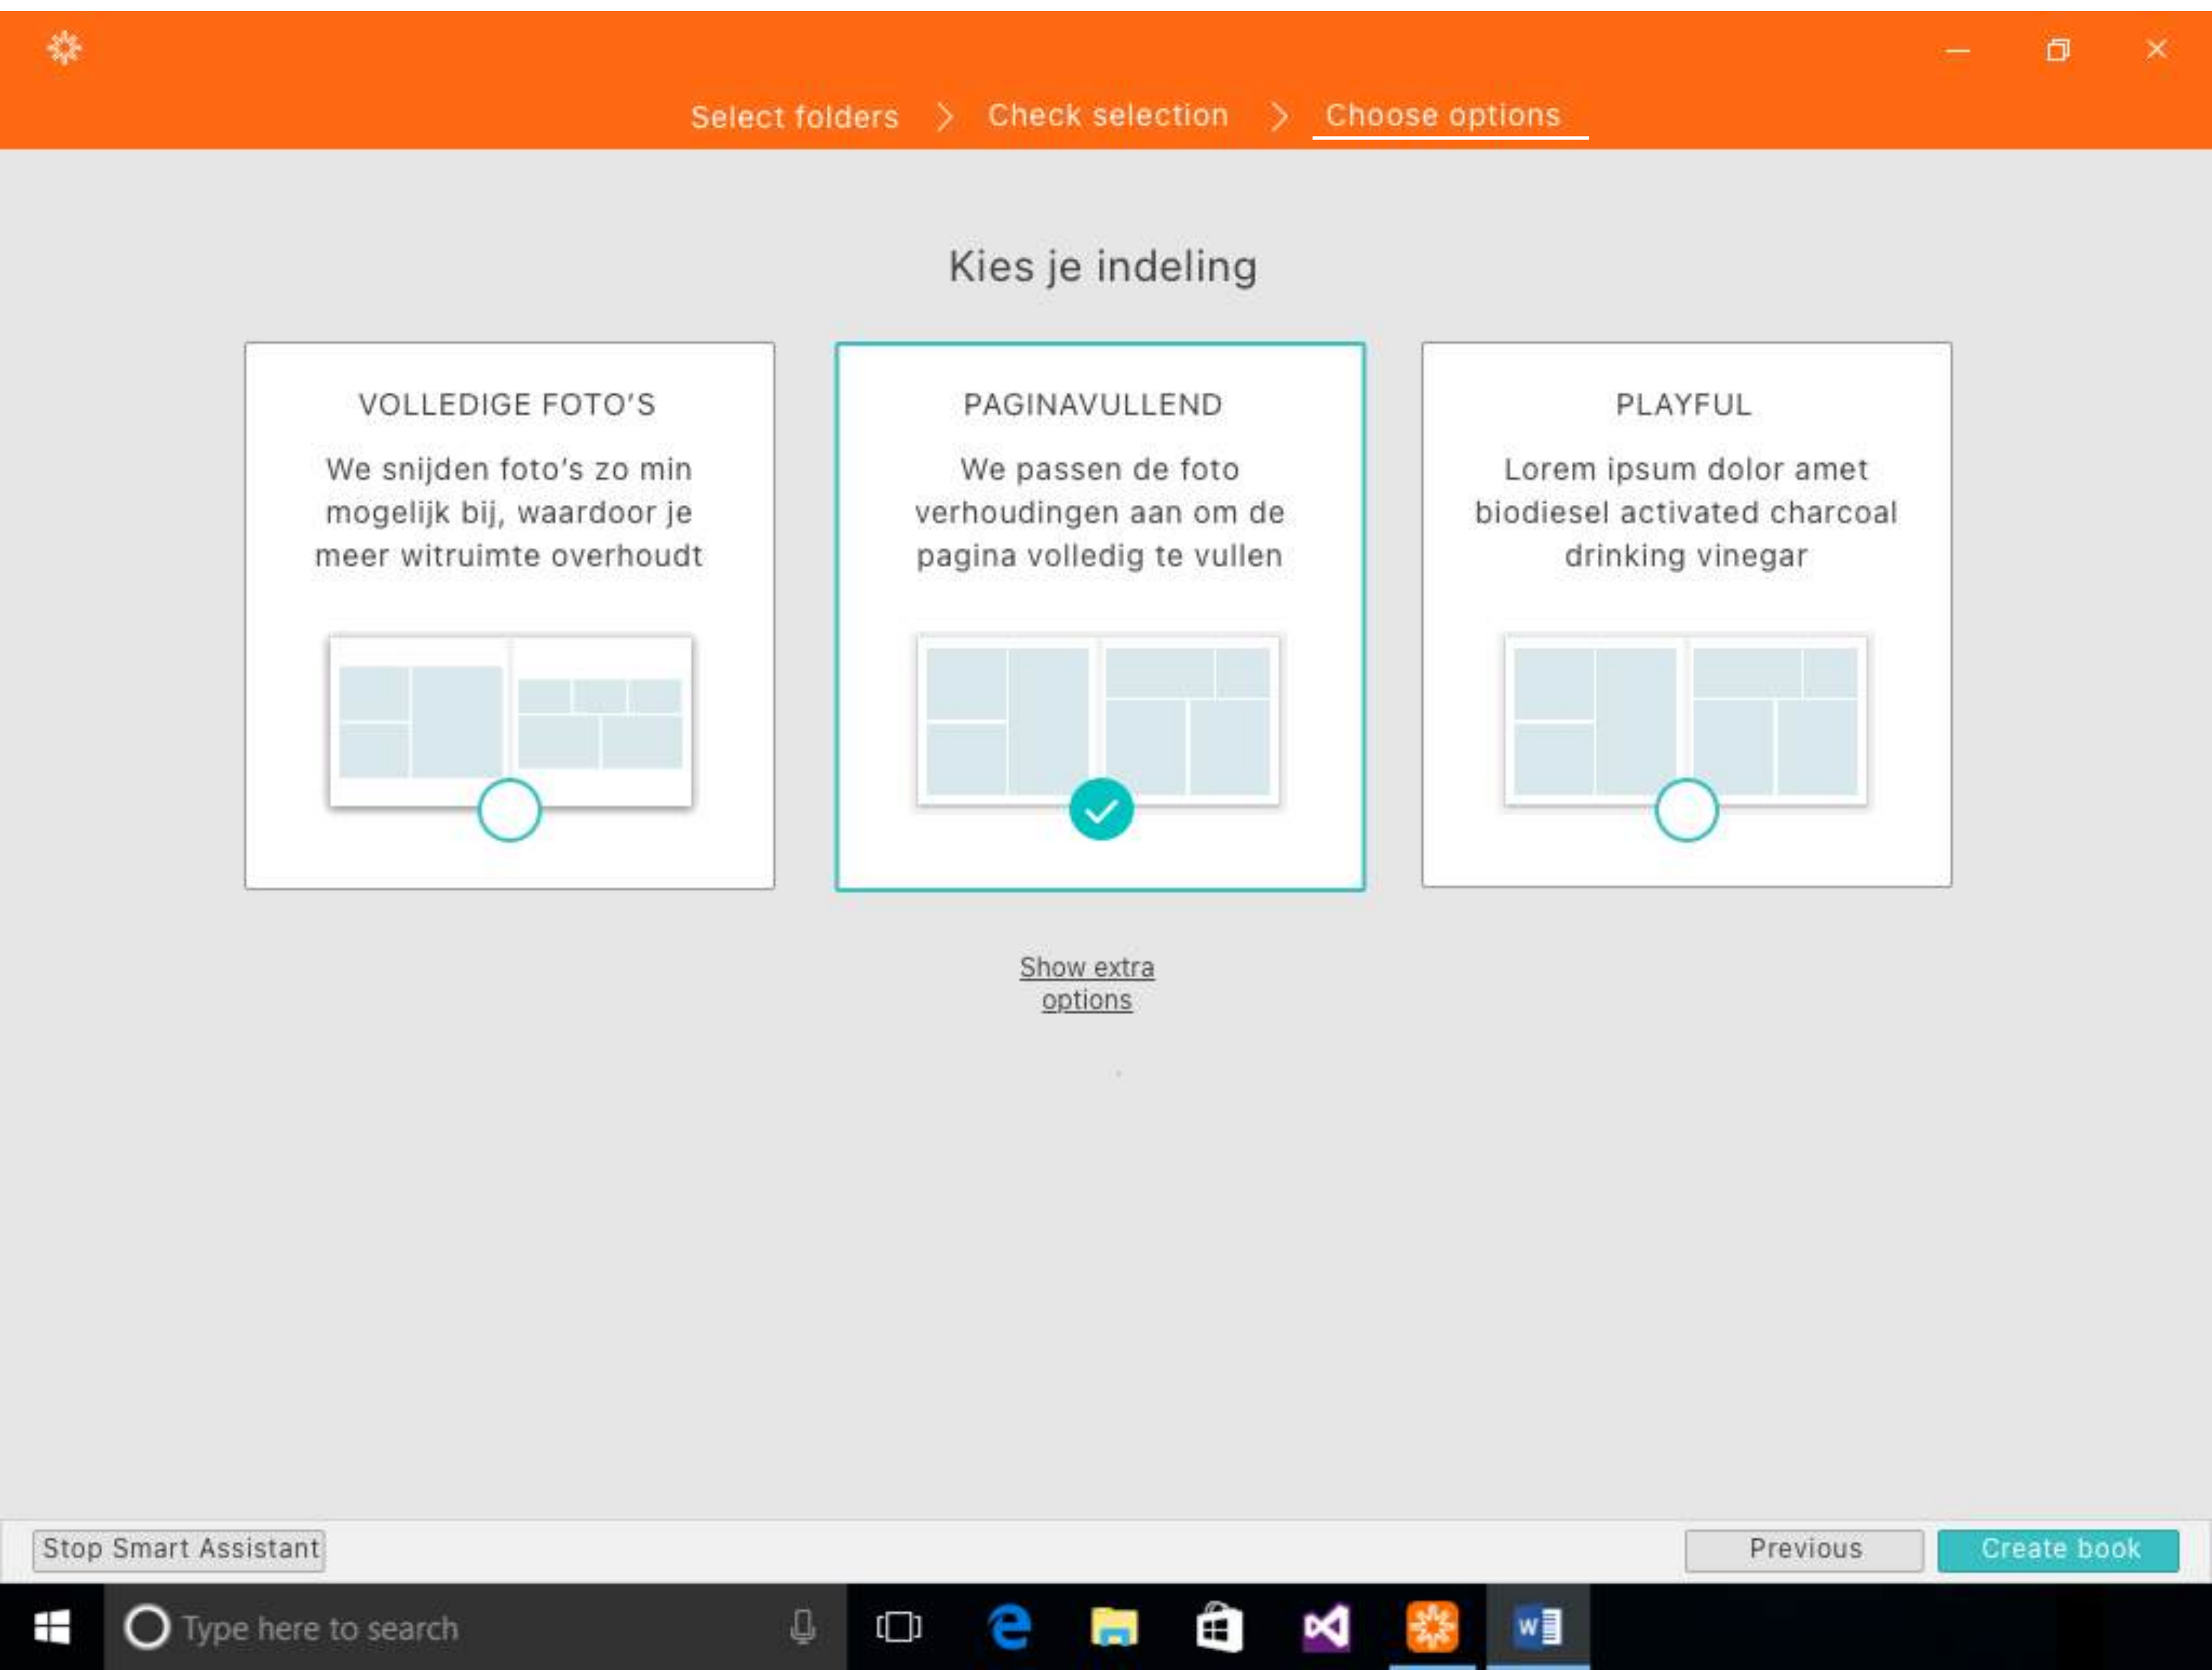

albelli had bought an AI engine (Smart Assistant) that should be able to select only the best photos from a big batch for the customer and create a photobook that takes the photo dimensions and content into account. I needed to weave that new feature into the current editors (Windows and Mac)

ROLE

Senior UX Designer
UX Researcher

EXAMPLE SCREEN

from the Windows Editor flow. Of one of the few choices the user needed to make to let the Smart Assistant create a photobook for them.

Windows editor re-design

SHORT DESCRIPTION

The UI of the Windows editor look was getting outdated. I was asked to re-design the UI of the editor within the capabilities of the development stack.

ROLE

Senior UX Designer
UX Researcher

EXAMPLE SCREENS

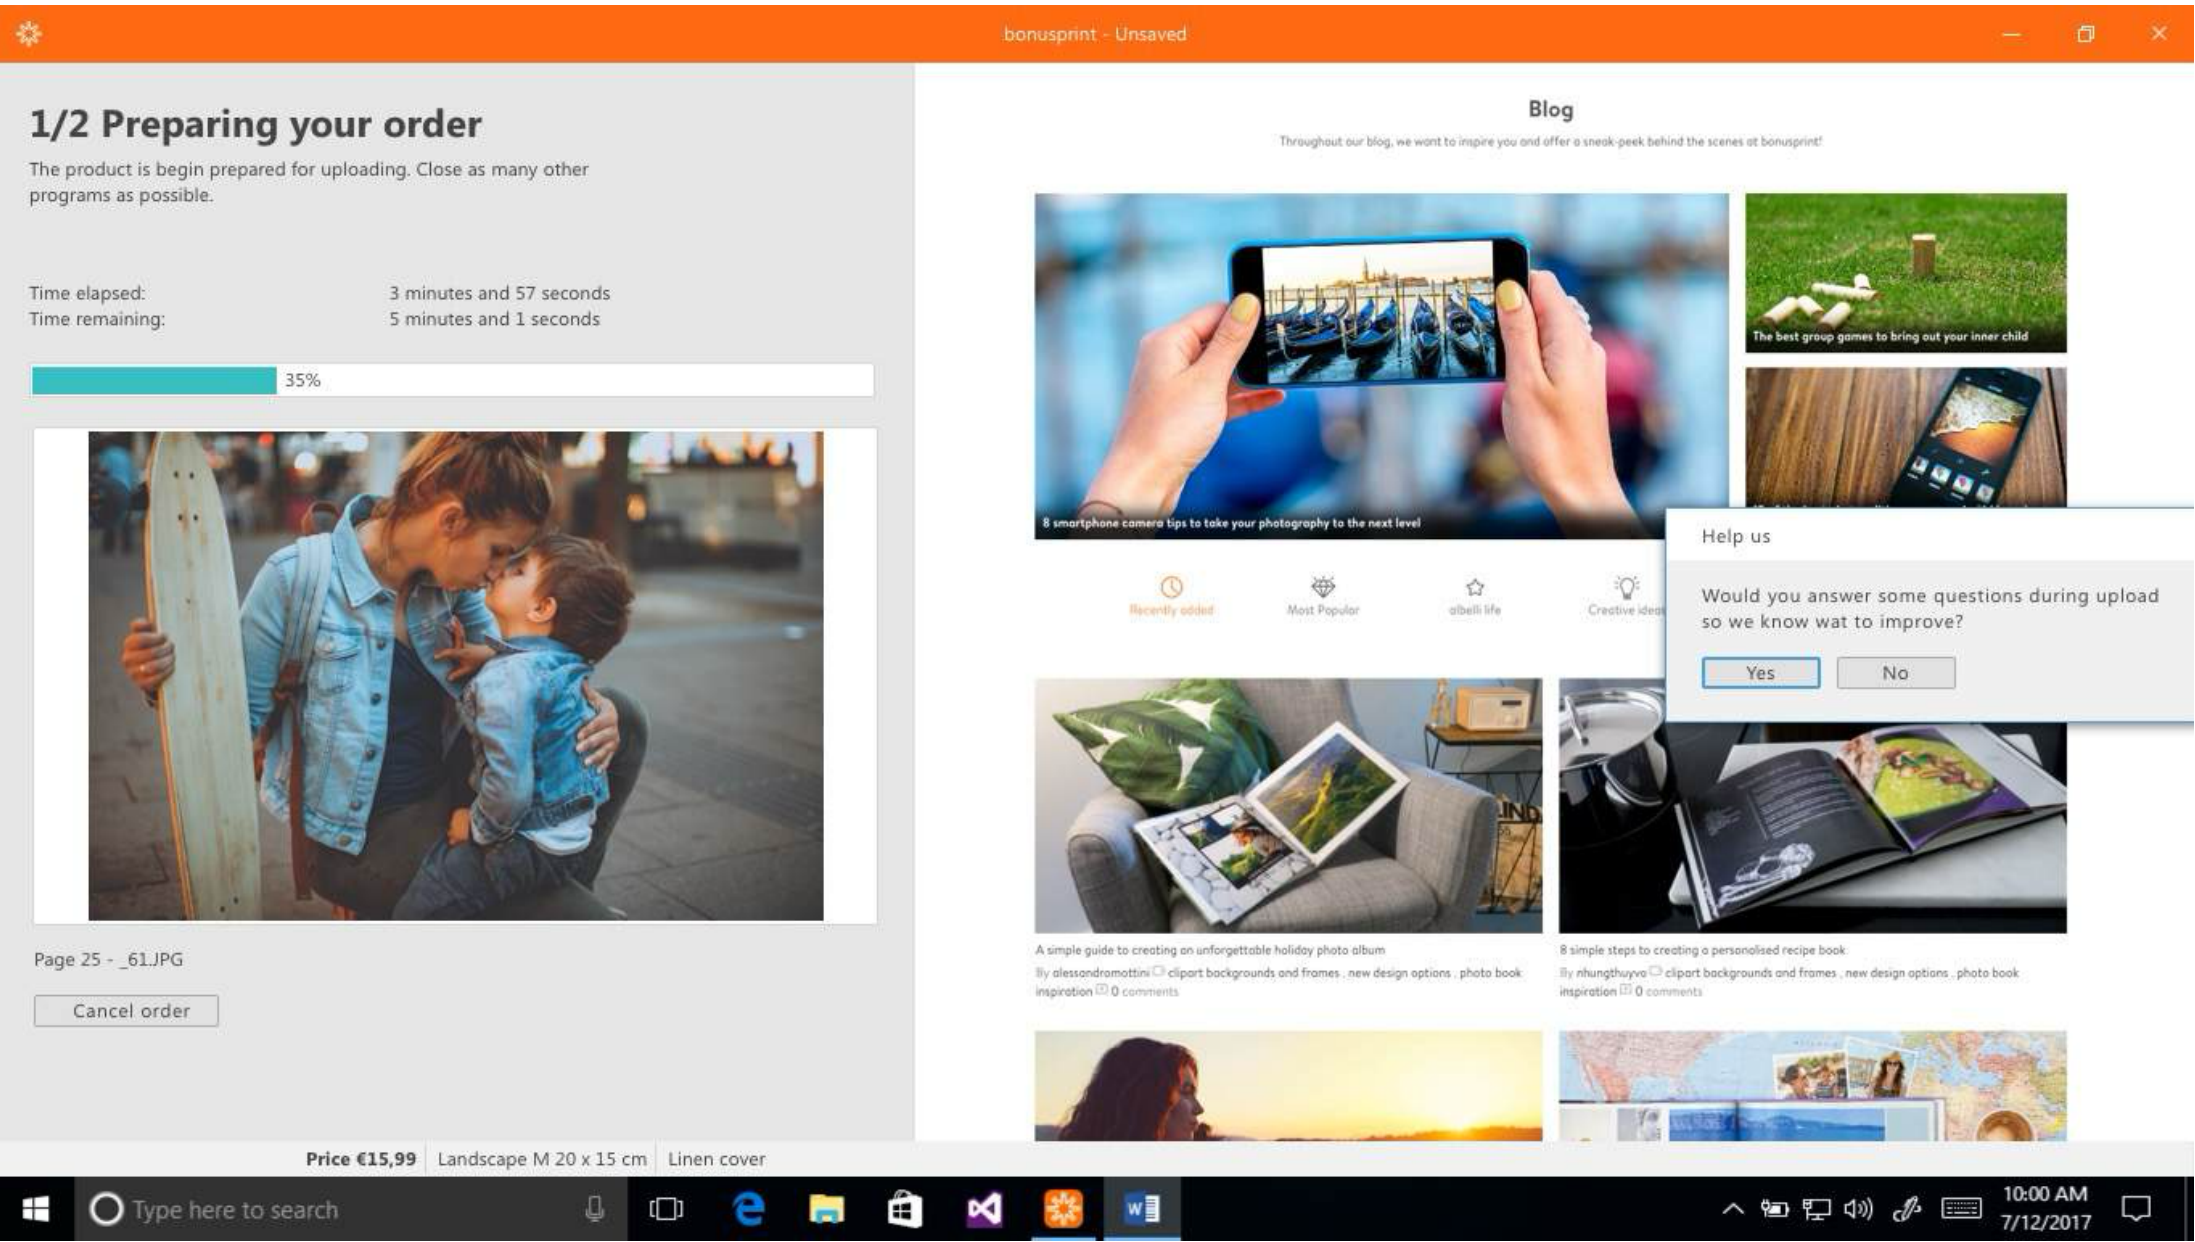

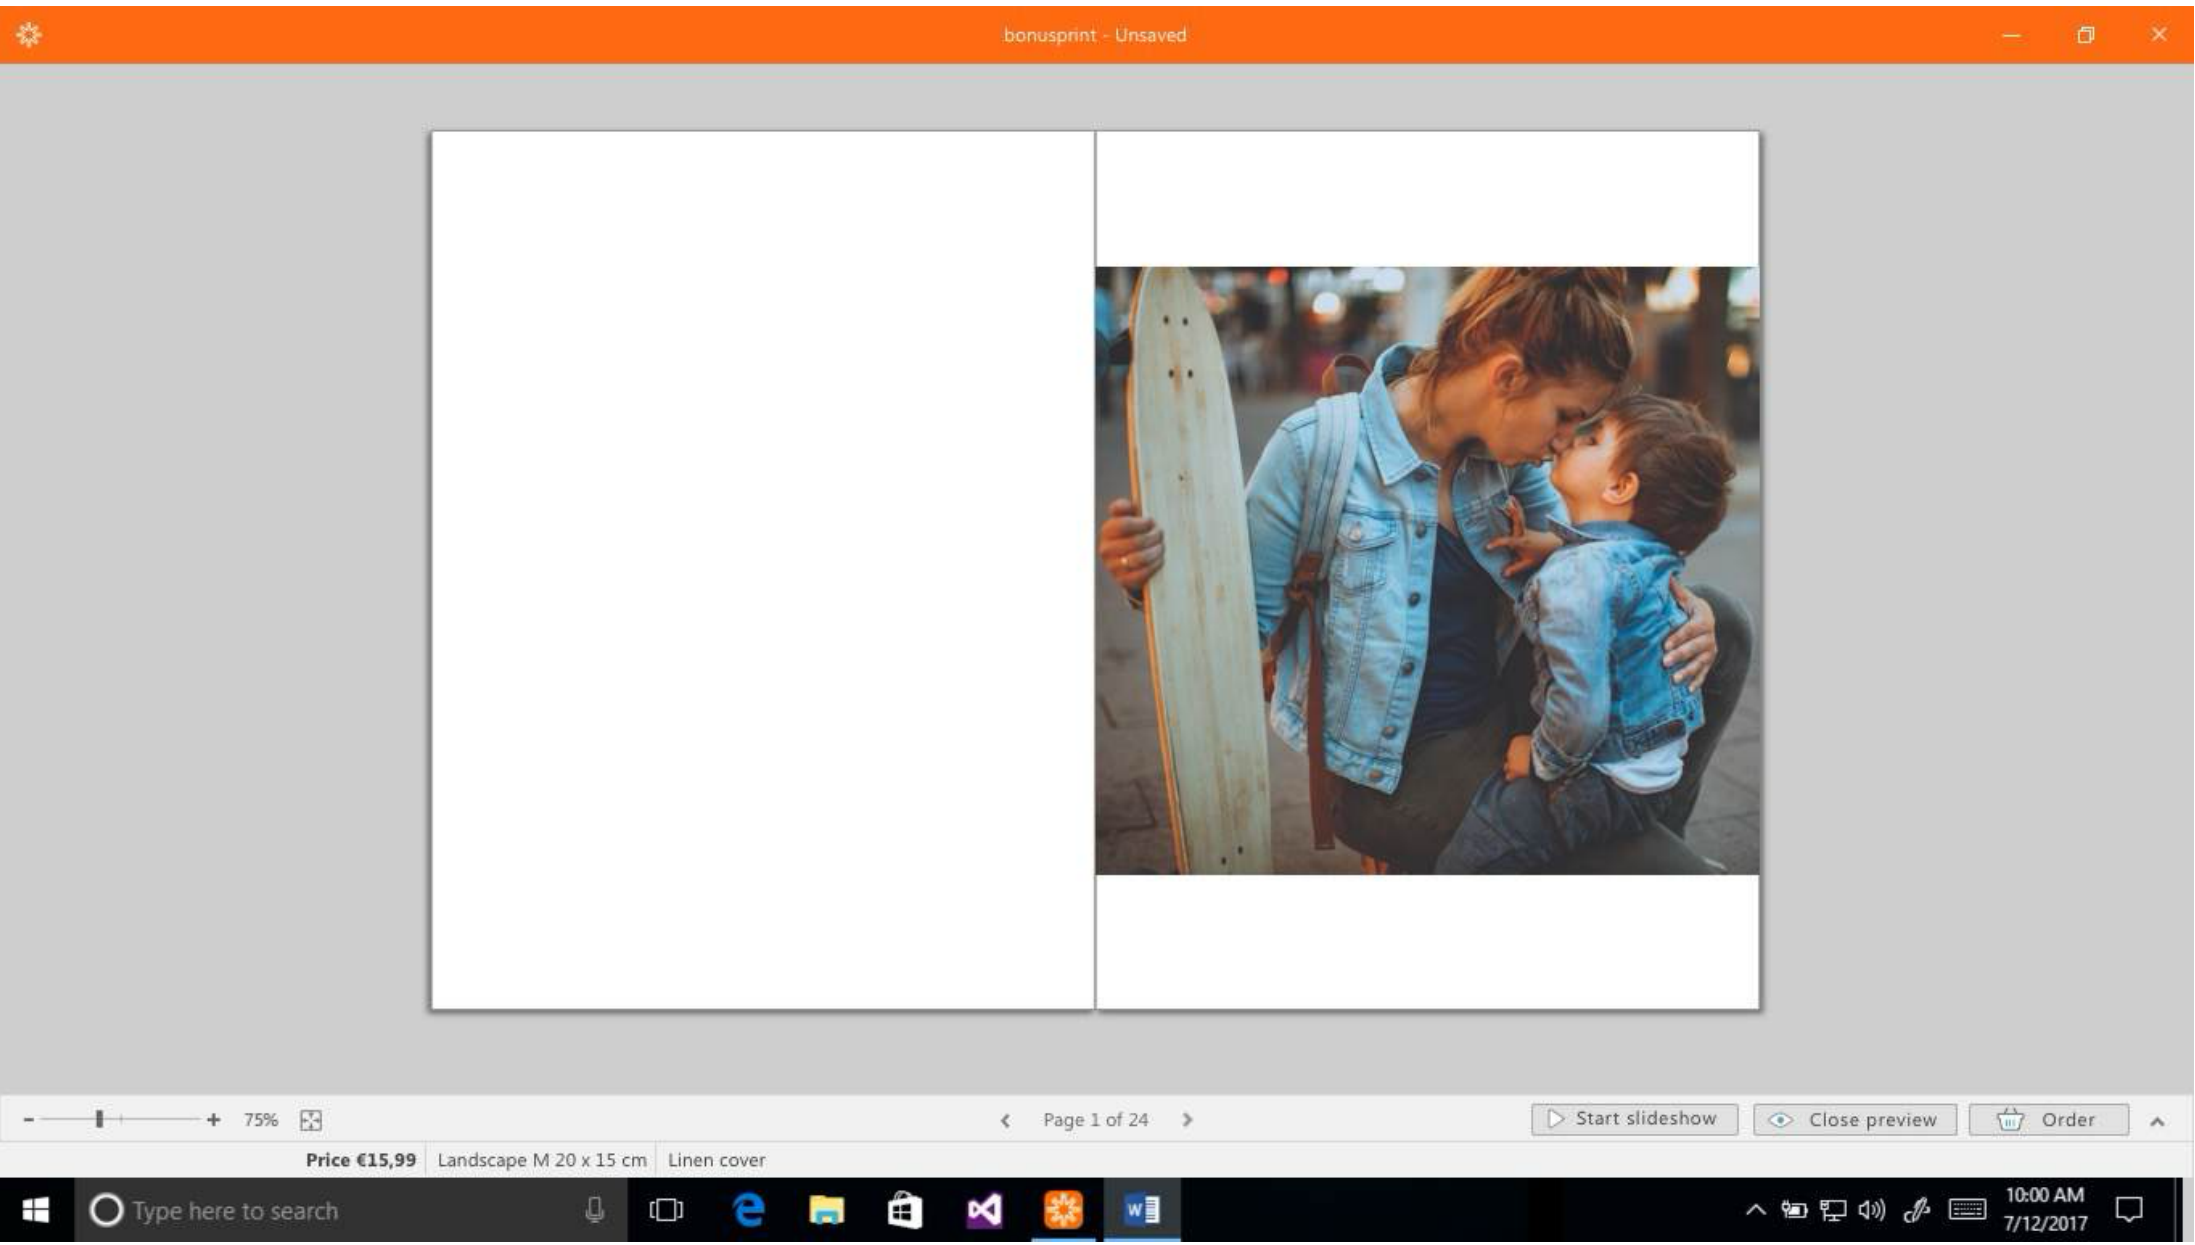

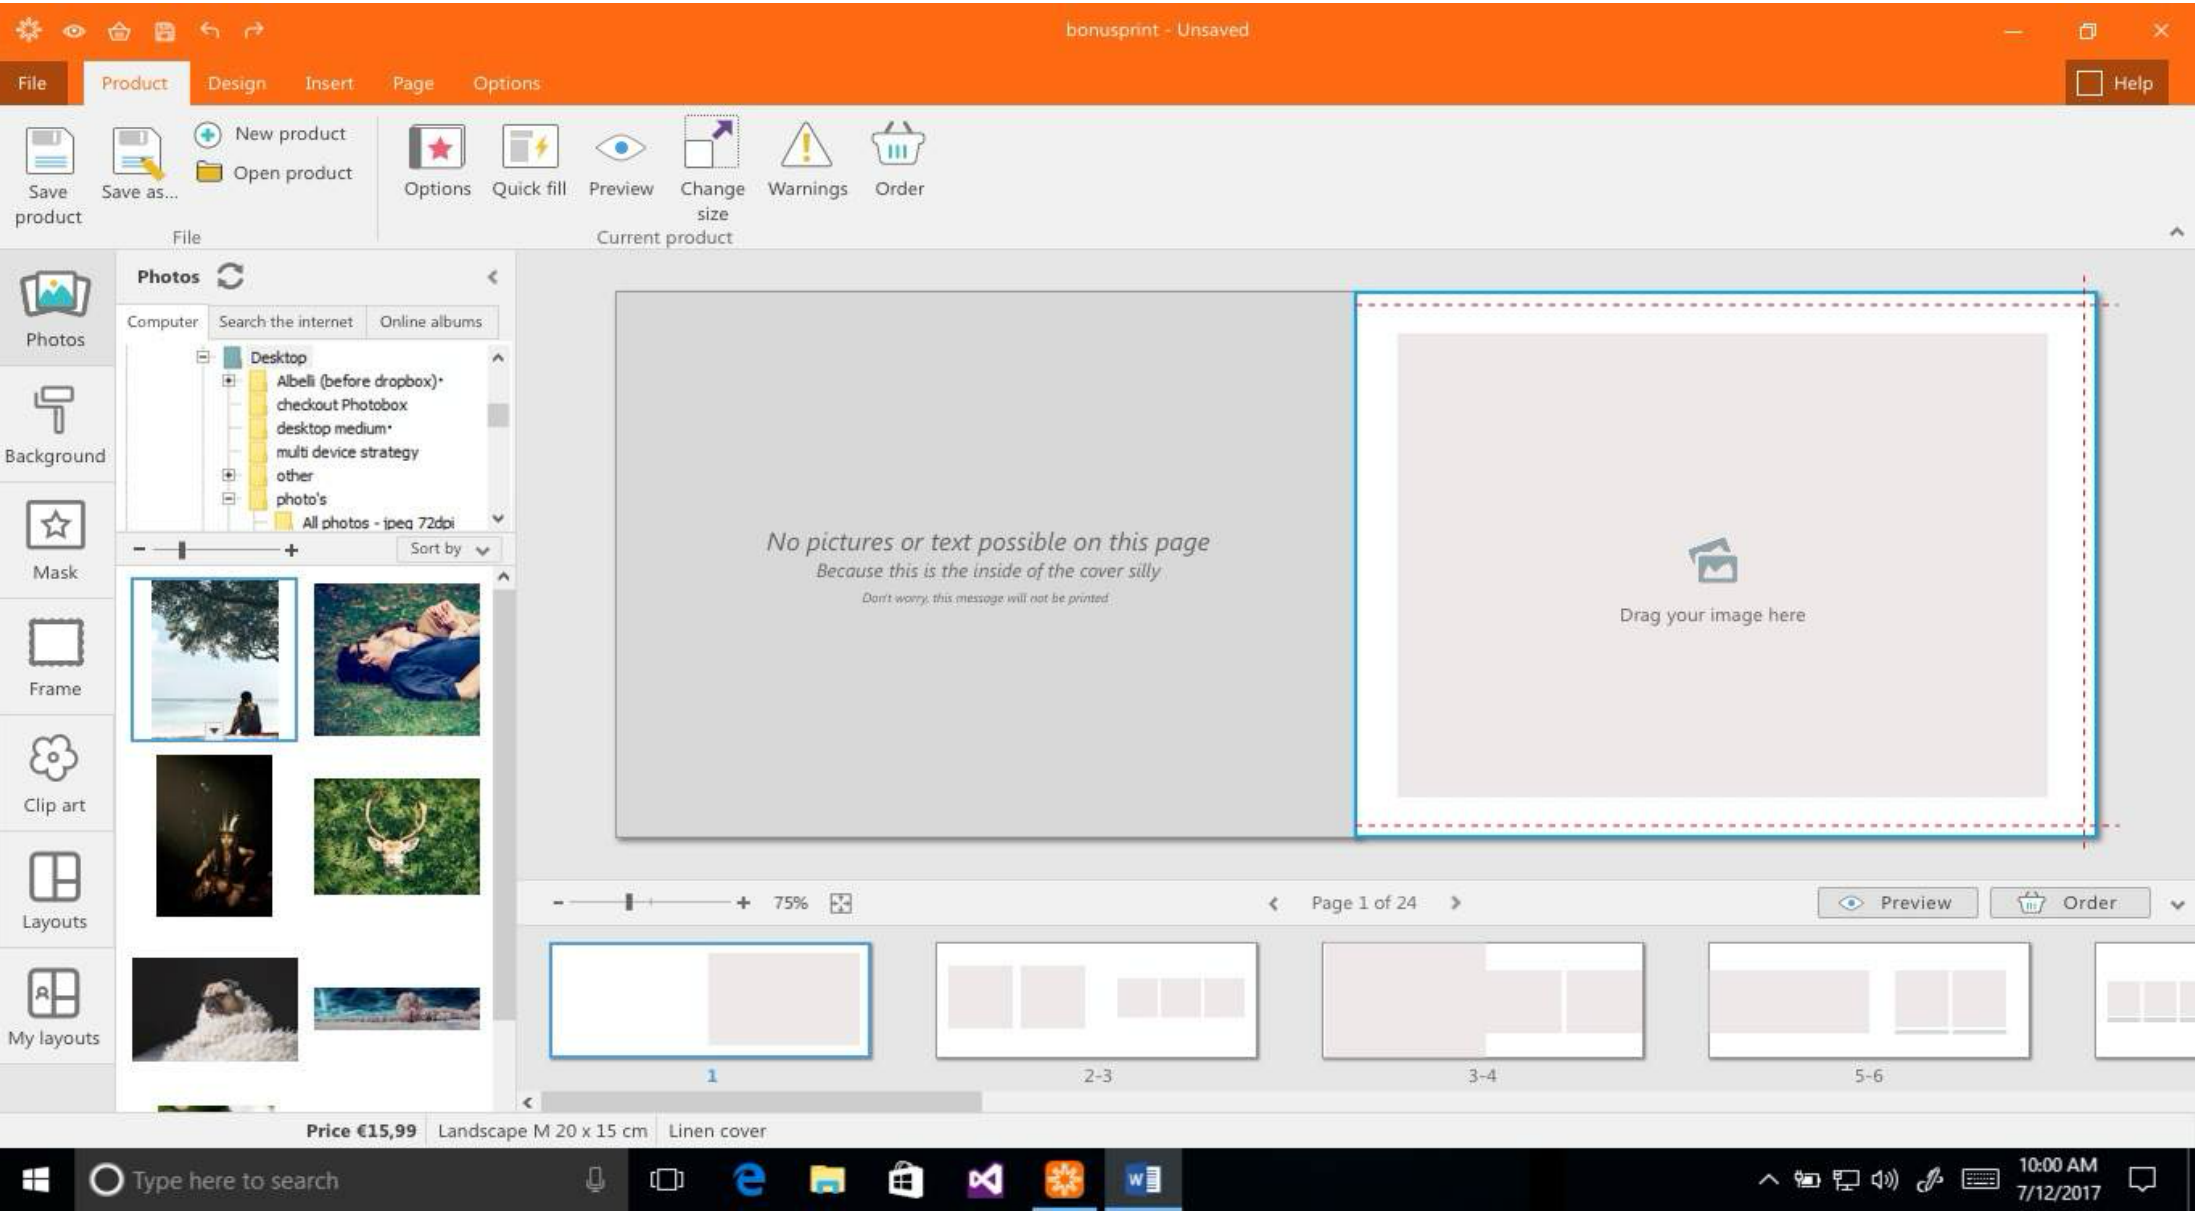

Photo Organizer

SHORT DESCRIPTION

albelli had taken over the photo products company Minnebanken in Norway (before I joined). But next to their editors they also had a service to save the photos of their customers, which many users used. I helped Minnebanken with the design of features that try to persuade the user to use those photo's to buy photo products.

ROLE

Senior UX Designer

EXAMPLE SCREENS

Of the design and touchpoints of personalised cross sell cards
