DESIGN PHILOSOPHY

Fix the system

I want to solve the real problem, not the pretty one, whether that means rethinking the underlying process or redesigning the flow, screen, or interaction that surfaces it.

Fast when it's cheap to be wrong

I move fast when the cost of a mistake is low, and slow down when it isn't. Process is a tool for managing risk, not a ritual to follow.

Make the abstract tangible

Most products and services are messy under the surface. I untangle that mess into something clear enough for people to act on.

I'll loop anybody in

From engineers and researchers to PMs and VPs, whoever's remotely connected or interested in the project, if it gets us to a better result faster. I don't wait for the correct moment to bring them in.

SKILLS

AI-augmented design workflows

PROFESSIONAL EXPERIENCE

Senior Product Designer · 3 yrs

Adyen is a global financial technology platform that provides unified payment processing, data insights, and financial management for businesses.

Payment risk management (RevenueProtect)

Dec 2022 – Dec 2025

- Owned design and qualitative research for RevenueProtect, Adyen's tooling for merchants to handle, mitigate, analyze, and monitor fraud and disputes
- Led machine-learning explainability concept research, shaping a longer-term vision that added high-impact, high-complexity topics to the roadmap
- Designed backtesting functionality, letting users evaluate the potential impact of risk changes by mapping them onto past payments
- Expanded the risk & dispute dashboard to support disputes, case management, and ML performance monitoring
- Redesigned all risk profile pages and interactions, shifting the core model from score-based to action-based, and supported the migration
- Designed the full concept for explaining ML evaluations behind blocked or allowed payments

Revenue & Risk product category (Uplift) – Project Lead

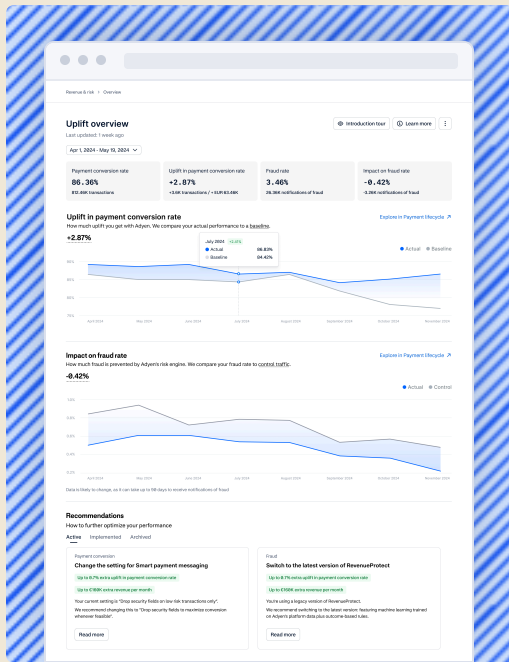

May 2024 – Dec 2025

- Led design for Uplift, connecting Adyen's revenue optimization and risk products into one simplified, self-serve experience
- Set up and coordinated the department's first UX resource plan, aligning capacity across 7 Product Managers and 7 UX'ers
- Simplified revenue optimization configuration from 100+ back-office settings down to 5 self-serve settings – and organized a 60+ person department leads offsite to align on the direction

Compliance as a Service (KYC)

Jun 2025 – Dec 2025

- Replaced error-prone, manually maintained Excel sheets for risk checks with a web application that correctly handled the many variations by risk level and merchant-side user role
- Eliminated manual cross-referencing, cutting errors and dramatically shortening the time to reach a final decision
- Enabled new capabilities the spreadsheet couldn't support, such as comparing risk check lists to verify they were still up-to-date or adapt quickly to changing risk situations

LATEST PROUD MOMENT

As Project Lead at Adyen, my conceiving and JTBD research for Uplift, a proposition connecting 5 separate products around one bottom-line metric, exposed that our portal navigation couldn't support it. A visible gap between what marketing promised and what the product delivered. My manager formed a tiger team to fix it fast and picked me as Uplift's representative. Presenting the findings at VP level surfaced company-wide disagreement on product priority, and leadership made navigation a top priority for the Platform team.

ING

Senior UX Designer • 4 yrs 1 mo

ING is a Dutch multinational banking and financial services corporation serving millions of clients in over 40 countries, with over 8 million customers in the Netherlands alone.

Mortgages

Jan 2020 – Nov 2022

- Redesigned the results of multiple orientation calculators into one reusable result card, simplifying output to three key numbers and reusing the pattern across other mortgage processes
- Redesigned and user-tested a calculator letting users adjust the composition of their mortgage
- Designed a new calculator and flow enabling users to explore raising their mortgage to fund a renovation
- Created concept designs for the next phase of the orientation hub to align stakeholders on requirements and roadmap
- Built an interactive prototype visualizing the customer journey (Scope through Purchase) that connected ING's separate mortgage products into one coherent journey, and presented it to upper management to increase awareness and encourage its use as strategic guidance
- Led the Sales Expert Team, a group of 3 UX designers improving sales patterns bank-wide through shared design patterns

Marketplace for Entrepreneurs (SME)

Nov 2018 – Dec 2019

- Designed the addition of 3 new product categories and supporting functionality, improving cross-category comparison for entrepreneurs
- Ran and reported on 2 usability research sessions (6 users each), reaching an average SUS score of 75
- Acted as first point of contact on planning and vision for the Business Banking management team
- Supported and mentored two other designers within the Business Banking domain

Amsterdam University of Applied Sciences

Teacher and Student Coach, UX Minor · 5 mos parttime

Feb 2021 – June 2021

- Taught the basics of Human-Computer Interaction Design to 21 students across 6 online workshops, grading a case assignment and a cross-class final project
- Coached 4 students in developing their designer attitude through a structured coaching programme

Albelli

UX Chapter Lead · Senior Product Designer · 2 yrs 1 mo

Albelli is a leading European online retailer that transforms digital photos into personalized physical products like photo books, wall art (canvas, posters), calendars, and cards.

UX Chapter Lead

Apr 2018 – Nov 2018

- Set up Albelli's first UX Chapter, managing three designers and an expertise development plan, reporting directly to the CTO
- Advised leadership during the evaluation of two potential acquisitions
- Presented the Chapter setup process at a UX meetup to an audience of 50+ designers

Senior Product Designer, Photo Product Editors

Nov 2016 - Nov 2018

- Owned design for five teams from a centralized backlog, later embedding within two development teams focused on continuous improvement of the downloadable photo editors
- Shaped a validation plan and designs for adding AI-assisted features to two editors; the launch reached a mood score of 3.4/5
- Led a visual redesign of the Windows editor to improve perceived usability, lifting mood score from 4.1 to 4.2/5

Rabobank

Lead UX Designer · Interaction Designer · 2 yrs 8 mo

Rabobank is a Dutch multinational banking and financial services corporation serving millions of clients in 35 countries, with over 9 million customers in the Netherlands alone.

Lead UX Designer, Mortgages

Jan 2016 - Oct 2016

- Led UX for two development teams, owning all UX services delivered to the Mortgages department
- Flipped stakeholder perception of UX from negative to positive by restructuring the team and setting a clear, measurable goal: a positive SUS rating
- Expanded the employee-facing mortgage application from supporting one user segment to all five, and organized UX research for the domain (4 studies)

Interaction Designer, Daily Banking

Mar 2014 - Jan 2016

- Delivered responsive interaction designs and prototypes for the app's main overview screen, navigation, and settings, as part of a redesign built on hybrid technology
- Set up the first iteration of a UI library later adopted across all departments of the bank
- Advised on accessibility improvements for visually impaired users, working with the national eye association and WCAG 2.0 analysis

Junior UX Consultant, Mobile Department · 11 mos

Sogeti is a leading IT firm within the Capgemini Group, known for expert-driven, rapid delivery of cutting-edge tech consultants or solutions that drive tangible business outcomes.

- Supported the Sales team by joining client workshops and building quick prototypes to win contracts, then delivered fully specced designs once contracts were signed
- Delivered fully specced cross-platform designs (Android & iOS, tablet & mobile) for a knowledge-sharing app used by Cap Gemini's international test community

VOLUNTEERING

AmsterdamUX Meetup

Event Coordinator · Jan 2023 – May 2024
· 1 yr 5 mos

Organized the monthly UX Monthly meetup together with another volunteer.

EDUCATION & CERTIFICATIONS

Haagse Hogeschool

Bachelor of ICT, Communicatie & Multimedia Design

AI & design tooling (2026)

Self-directed coursework: *Claude Code for Designers*, *AI for Actual Work* (Remote.com), *AI UX Design Guide*, and *Claude Code: Software Engineering with Generative AI Agents* (Vanderbilt University, via Coursera)
